PARTIALLY SUCCESSFUL The United States Leads the World-In-WASHINGTON, July 26 .- Mr. David T. Day, Chief of the Division of Mining Statistics, has submitted a summary of the mineral products of the United States in 1887 in advance of the official report. The total value is \$508,006,345. It shows a wonderful gain over 1888, and is \$100,000,000 greater than the output of 1885. The United States leads the world in the production of minerals. The principal gains in '87 were in the production of me-tallic ores and the fuels necessary for melting them. The production of pig-iron alone increased more than \$26,000,000. The higher price of copper caused notable ex-pansion in that industry. The product of coal is the largest ever recorded. Taken lars, the report says, resulted not only from the quantity of minerals mined, but also from a general advance in the prices of metals. It may be several years before

He raised a winder and looked out, but there was no sign of my thing startling taking place. Mr.

and in an instant Lincoln avenue for blocks was astir. A piece of gas-pipe splintered to pieces and a large hole in the ound told the tale. "They tried to blow Kreuger up," was on the lips of every body. The bomb had been placed half way under the south corner of the house, in the front. It had blown upward after plowing a furrow in the ground, and at one corner of the building there is the mark of the missile, which nearly gouged its way through the board. The front of the house was bespattered with the explosive. The police were first of the opinion that it was simply a scare, and that the pipe was charged with nothing but powder. It has since been demon-strated that it contained dynamite, and that probably only the clumsiness of the maker prevented a wreck. that can not be controlled by Federal action. The decisions of the Supreme Court have repeatedly shown that fact. One wonders why the Republicans do not follow the path so plainly pointed out by the events of the last twenty years and why they do not resect to State action, to State agitation for the establishment of any rights that are now denied them. The truth is, few of the evils of which complaint is made are political in nature, and not many can be cured by political action. The policy of denunciation and hate has been fully tried, he said. Let us try the opposite course.

Milton Turner said he was beaten in an open fight and he accepted his defeat with the utmost satisfaction. He paid his respects to the local Republican press and said: "The Republicans think this movement is a joke. In some sense it certainly is; but it is a pretty serious joke, as will be shown next November." He closed by declaring that "in the Republican party there is to day more means for greasing the wheels for us than there is in the

NO COMPROMISE. Brotherhood Men All Along the "Q" Line Vote Against Calling Off the Strike -What the Trouble Has Cost the Road CRICAGO, July 27.-Chairman Hoge and Murphy returned from their joint trip over the "Q," made for the purpose of ascer-taining the feeling of the strikers in regard to declaring the strike off on the basis of propositions made by the com pany. These propositions were that no of the strikers should be blacklisted; the of the strikers should be blacklisted; that as many of the strikers should be taken back as existing vacancies would allow; that preference should be given the strikers in filling new vacancies, and that letters of recommendation should be given to all who desired them. Chairman Hoge said these propositions had been submitted to every important lodge on the "Q" system, and the mea everywhere voted unanimously to reject everywhere voted unanimously to reject them.
